**DESCRIPTION OF THE DISTRICT**

LLAD No. 2 is located within the boundaries of the Rosamond Community Services District and the proposed Annexations No. 2016 - 3 through 2016 - 42 are comprised of forty seven (47) subdivision tracts within forty (40) Annexations, totaling 3,462 lots. Each Annexation within the proposed Annexations is located within the boundaries of the District with one exception. Tract No. 5329, Annexation No. 2016 - 39, located to the east of the District boundary and north of Rosamond Boulevard is the one exception to all Annexations being located within the District’s boundaries; Tract No. 5329, Annexation No. 2016 – 39 is located within the map of Rosamond Community Services District’s Sphere of Influence.

The lands within the Annexations are shown on the Assessment Diagram that may be found in “Exhibit B”. The Assessment Diagram will be on file in the office of the Secretary of the Rosamond Community Services District and will be available for public inspection during normal business hours. All parcels, within each Annexation, are described in detail on various maps on file in the Kern County Assessor’s Office. The benefitting Annexations will annex into the Assessment District, by way of Annexation Nos. 2016 – 3 through 2016 - 42, the parcels within the effected subdivision tracts were developed prior to Fiscal Year 2005-2006.

**DIRECT BENEFIT**

The Annexations, No. 2016 – 3 through No. 2016 – 42, have been divided into Forty (40) individual Zones of Benefit in order to equitably distribute the cost to the parcels receiving benefit from the street lighting.

**GENERAL BENEFIT**

The benefit is primarily to the lands within the annexations and is incidental and de minimus to others.

**METHOD OF APPORTIONMENT**

The net amount to be assessed upon lands within Annexations No. 2016 - 3 through No. 2016 - 42 have been apportioned by a method which fairly distributes the amount among all assessable parcels or lots in proportion to the estimated special benefit to be received by each parcel or lot from street lighting improvements within each annexation. The primary benefits to properties from the street lighting improvements are as set forth below;

1. Increased nighttime safety on roads and streets,
2. Improved traffic circulation and reduced nighttime accidents,
3. Improved ingress and egress to property,
4. Reduction in vandalism and other criminal activities,
5. Improved access of emergency vehicles,
6. The enhancement to the value of property, which results from the foregoing benefits.

The table below lists each type of development with the corresponding EDU value and multiplier based on recent Kern County Assessor Parcel information.

An Equivalent Dwelling Unit (EDU) basis was used to allocate the proposed assessments within each annexation. A single-family residence was given a value of one (1) EDU. From this base, different parcel land uses that may be annexed into the Assessment District in the future will be converted to EDUs based on an assessment formula that equates the type of land use and size to a single-family residence. Commercial and industrial developments will be assessed at the rate of 4.0 EDUs per gross acre based on the fact that residential developments within the Assessment District average about 4.0 single-family residences per gross acre. Commercial/Industrial parcels less than 0.25 acres will be assessed a minimum of one (1) EDU. Multi-Family and mobile home units are typically smaller than single-family homes; these developments will be assessed at 0.75 and 0.5 EDUs per unit, respectively. Sump lots, parks, dedicated public easements, utility right-of-ways and other properties that cannot be developed are considered to receive little or no benefit from the improvements and are therefore exempt from assessment.

<b>Development Type</b>	<b>EDU Value</b>	<b>Multiplier</b>
Single-Family Residential	1.0	Unit
Multi-Family Residential	0.75	Unit
Mobile Homes	0.5	Unit
Commercial/Industrial	4.0	Gross Acre

## ASSESSMENT FORMULA

The following formula was used to calculate each of the proposed Annexations' parcels' EDU;

$$\text{Parcel EDU} = \text{Development EDU Value} \times \text{Acreage or Dwelling Units per Parcel}$$

For each Annexation, the assessment amount per EDU was established by dividing the total maximum assessment balance by the total number of EDUs. The assessment was then multiplied by each parcel's EDU to determine that parcel's proportionate assessment as shown below.

$$\text{Assessment per EDU} = \text{Total Assessment Balance} / \text{Total EDU}$$

$$\text{Parcel Assessment} = \text{Assessment per EDU} \times \text{Parcel EDU}$$

For Fiscal Year 2016-2017, the preliminary assessments will be allocated to the current parcels listed in the Assessment Roll attached hereto as "Exhibit A" and the Annexations will be shown on the Assessment Diagram.

**Note:** All listed parcels are eligible for assessment in Fiscal Year 2016-2017 as the street lighting in each Annexation is in place and accepted for maintenance by the District.

### Escalation of Future Assessments

Commencing with Fiscal Year 2017-2018, assessments may be increased annually for inflation, based on the Consumer Price Index-All Urban Consumers for the Los Angeles-Riverside-Orange County Area (CPI), as determined by the United States Department of Labor, Bureau of Labor Statistics, or its successor. Should the Bureau of Labor Statistics revise such index or discontinue the preparation of such index, this District shall use a revised index or comparable system for determining fluctuations in the cost of living, as approved by the Board of Directors. The Maximum Assessment is defined as the initial Assessment (approved by property owners within the District) adjusted annually by the CPI. If the proposed annual assessment for a given Fiscal Year is less than or equal to the calculated Maximum Assessment, then the proposed annual assessment is not considered an increased assessment.

### Assessments for Fiscal Year 2016-2017

Each proposed Annexation's budget for Fiscal Year 2016-2017 is shown in the table shown on the five pages that follow. The first year's budget numbers are based on the estimated cost of maintenance, and operation for the street lighting, legal expenses, finance expenses and SCE expenses. These costs are used to calculate the assessments for Fiscal Year 2016-2017 listed in "Exhibit A".
